General Care Tips

Mixed Bouquets & General Flower Care

Follow these simple tips from our floral experts to ensure the full enjoyment of your mixed bouquet of flowers.

- 1) Fill a clean vase $\frac{3}{4}$ full with fresh cool tap water and add 1 packet of flower food.
- 2) Cut 1 inch off the stems under running water and immediately place in vase.
- 3) Re-cut stems, change water and add second packet of flower food on day 3.
- 4) Keep flowers away from drafts, direct sunlight, and excessive heat or cold.

Blooming Plants - General Care

The same general care instructions may be followed for all the blooming plants featured here, including Persian Violet, African Violet, Mum (short for Chrysanthemum), and Mini Plants. Bloom colors may vary and may arrive in bud form, ready to bloom.

Water | The soil should be kept moist but never soggy. Allow the soil to dry out slightly between waterings. Remove the plant from the decorative container each time you water to allow for drainage. Slowly add water until it runs out the drainage holes at the bottom of the pot. To prevent the soil from becoming soggy, pour out any excess water that collects in the plastic after watering. Do not allow plant to sit in water for extended periods of time. Be sure to protect the surface on which your plant rests.

Light | Bright indirect light.

Care Tip | Violets: Once you find a place for the violet, make it permanent. Violets do not like to be moved around. To keep your violet looking healthy and vibrant, avoid getting water on the leaves.

Caring for Your New Monrovia® Plant

1. Congratulations on receiving this special gift! The plant has arrived in a young, budding stage, and with proper care will develop into full, spectacular beauty.
2. **OPEN THIS GIFT OUTSIDE.** The plant's custom soil blend contains living microorganisms called *mycorrhizae*, a natural fungus that will maximize the disease resistance and fertility of your garden's ecosystem by strengthening root growth, stimulating nutrient and water uptake and reducing transplant shock.
3. This plant has been uniquely selected for your garden or for displaying on a terrace or patio. To plant this gorgeous gift in a garden, please follow the Monrovia care instruction tag attached to your plant. If placing the plant in a container, please follow the below steps to ensure full enjoyment.

Five Tips for Successful Container Planting

Container selection: Select a container that is slightly larger than the Monrovia growing pot your plant has arrived in. You may have already received a decorative container as a special addition to your gift.

1. Add at least a 1" layer of gravel or lightweight, non-dissolving foam packing peanuts to the bottom of your chosen container before adding soil. Choose a quality potting soil that is light, sandy and drains quickly, but does not contain too much woody matter.
2. Remove the green Monrovia growing pot, and set the soil surface of the plant at least an inch below the top rim of your new decorative container. This will provide ample area for water without overflowing.
3. Never prune roots to fit into a pot. If roots become visible, it is time to transplant your Monrovia plant into a larger container.
4. Fill the empty space surrounding the plant inside the container with potting soil and then add top dressing, such as small stones, Spanish moss, or other surface material for moisture retention mulch on top of the planted soil.
5. Set your saucer and newly potted container plant in its preferred light exposure on a terrace or patio. Please use your attached Monrovia care instruction tag to help you decide if it requires sun or shade, and keep the tag as a handy aid. Lastly, water thoroughly and enjoy!

Includes built-in vacuum pump

A NEW patented pump, vacuums air out

• VACUUMS AIR OUT - LOCKS FRESHNESS IN
• STACKS FOR SAVING STORAGE SPACE

3 STEPS TO FRESH FOOD

1. Insert the pump handle into the lid.

2. Push down on the pump handle to start the vacuuming process.

3. Continue to push down on the pump handle until the air is removed.

4. The lid is sealed, and the container is ready for use.

Why Vacuum Storage? FOOD LASTS 3-5 TIMES LONGER!

Most of us never need an airtight container to keep our food fresh. But when it comes to the things that we eat, we know that freshness is important. That's why we use vacuum storage. It locks in freshness and keeps your food fresh for 3-5 times longer. It's the best way to keep your food fresh and healthy. It's the best way to keep your food fresh and healthy. It's the best way to keep your food fresh and healthy.
